1.CVE-LIST displayed in /cves/list

The screenshot shows a web browser at localhost:3000/cves/list?page=1. The application displays a table titled "CVE List" with 250711 total records. The table has five columns: CVE ID, Identifier, Published Date, Last Modified Date, and Status. The first 10 records are visible, all with the identifier cve@mitre.org. The status of these records varies between Modified and Analyzed. The interface includes a filter section with a dropdown for "CVE ID", a text input for "Enter filter value", and an "Apply Filter" button. The sort order is set to "Ascending". The items per page are set to 10. The pagination shows the first page of 10 out of 250711 records.

2. Pagination

The screenshot shows the same CVE List application at localhost:3000/cves/list?page=11. The table displays records 1001 through 1100. The structure of the table is identical to the first screenshot. The pagination controls at the bottom show the current page is 11, with links for previous and next pages, and a range from 11 to 15. The total number of records is 250711, and the current view is displaying 1001 to 1100 of these records.
